

[environments where innovation thrives]

“DON’T UNDERESTIMATE YOURSELF”

Meet Tali, a Workshop Technician at Edwards Service Technology Centre. Tali chose a technical career because she likes to understand the engineering behind sophisticated machines. She is proud to work in the vacuum business, as it is an essential part of a growing number of industrial and scientific applications.

Tali’s advice to women considering a career in engineering? “Don’t be afraid of technical work, trust your abilities and don’t underestimate yourself. You can do it, no matter how hard the task is!”

If, like Tali, you would like to be part of an industry-leading team that is shaping the future, visit edwardsvacuum.com
